## DETAILED ACTION

### *Response to Amendment*

1. Applicant's Response filed May 16, 2005 has been placed of record in the file.

### *Drawings*

2. The drawings are objected to because the specific structure of the mechanism, which allows rotation in two orthogonal planes, is not clearly shown. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. No new matter should be entered. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-51 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

Art Unit: 2833

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant's claims are deemed unclear because the specific structure of the mechanism, which allows rotation in two orthogonal planes, is not clearly described in the Specification nor shown in the Drawings. Appropriate correction is required. No new matter should be entered.

### ***Allowable Subject Matter***

5. Claims 1-51 would be allowable if the Specification, the Drawings and the claims are rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action for the reasons stated in the Office Action of March 24, 2005.

### ***Response to Arguments***

6. Applicant's arguments filed May 16, 2005 have been fully considered but they are not persuasive. In response to Applicant's arguments (Pages 2-5) that the objections to the Drawings, the Specification and the 112 1<sup>st</sup> rejection of Claims 1-51 are improper, Applicant is reminded that Applicant's claims are deemed unclear because the specific structure of the mechanism, which allows rotation in two orthogonal planes, is not clearly described in the Specification nor shown in the Drawings. One with ordinary skill

Art Unit: 2833

in the art would not be able to use or make this invention since there is not a specific explanation on how the mentioned examples could be applied in the present invention.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
